

### Film Capacitors

#### CAPABILITIES

"Vishay-BCcomponents" gives an extensive overview of all preferred code numbers available for film capacitors.

Due to our technical capabilities we can offer at short notice on request the following deviating products.

#### Overview

| AVAILABLE ON REQUEST    | DESCRIPTION                                      | SERIES                   |
|-------------------------|--|--------------------------|
| Intermediate C-values   | E24 series with $\pm 5\%$ tolerance              | MKT 303/304              |
|                         |  | MKT 365/366/367          |
|                         |  | MKT 467/468/469          |
|                         |  | MKT/MKT 468              |
|                         |  | MKT 370/371/372/373      |
|                         | E12 series with $\pm 10\%$ tolerance             | Interference suppression |
|                         | E24 series with $\pm 5\%$ tolerance              |                          |
|                         | E48 series with $\pm 1\%$ or $\pm 2\%$ tolerance | KP 460 to 464            |
|                         | E96 series with $\pm 1\%$ tolerance              |                          |
|                         | E96 series with $\pm 2\%$ tolerance              | MKP 416 to 420           |
| Asymmetrical tolerances |  | All series               |
| Other lead lengths      | for loose products                               | All series               |
| Small reels             | for <250 pcs                                     | All radial series        |
