**Definition of** *pressure* (Entry 1 of 2)

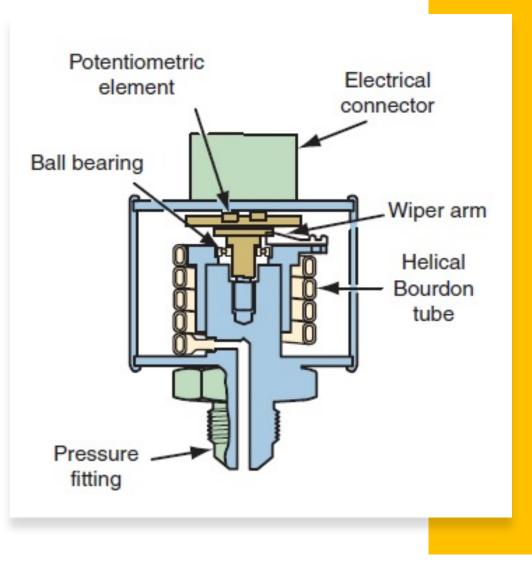

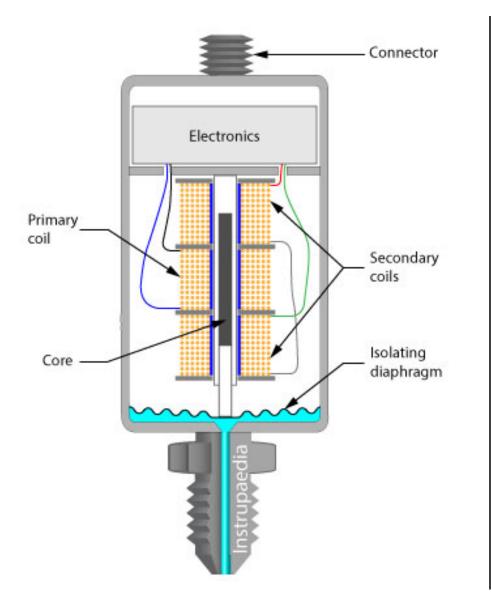

# Not long time ago in a classroom just down the hall....

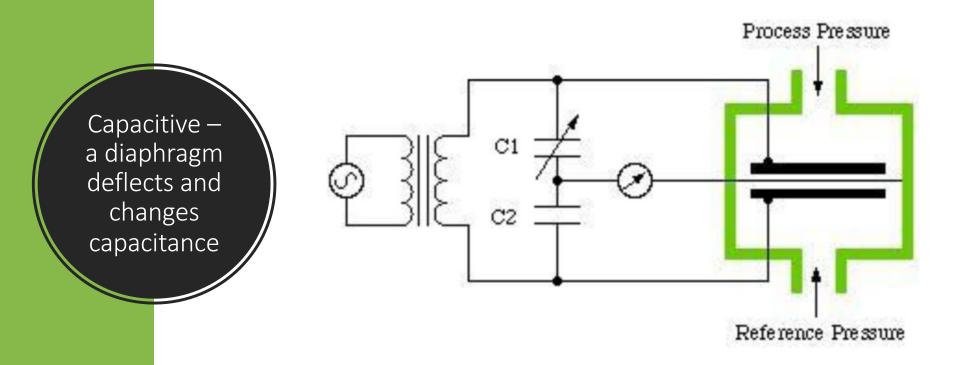

Potentiometric – bellows (or Bourdon tube) driving a wiper arm connected to the electronics

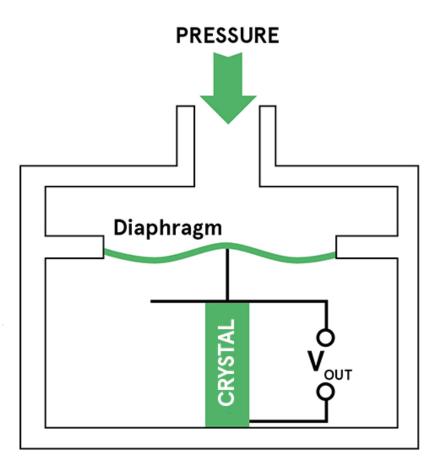

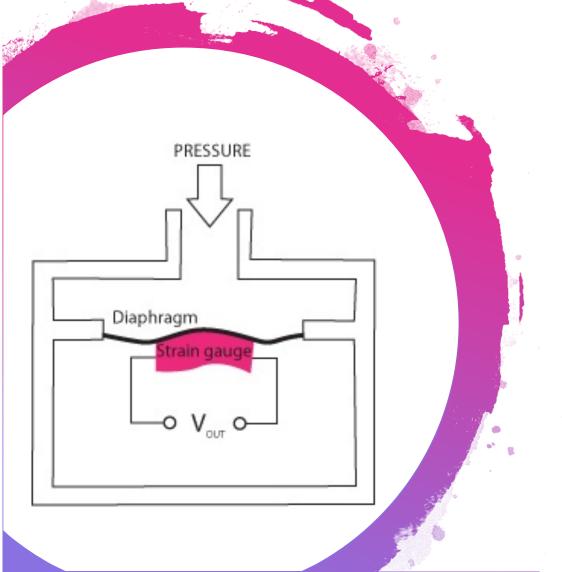

Inductive – a post moved by pressure changes induces a current between coils in a transducer

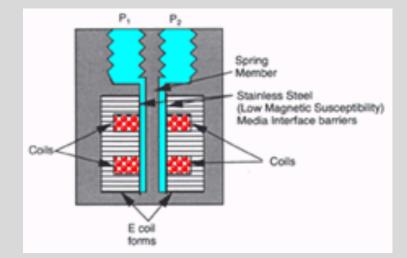

Piezoelectric – materials with special properties generate electric potential under mechanical stress

Strain gauge – uses strain gauges to measure membrane deflection via piezoresistance Variable reluctance – change in diaphragm deflection causes magnetic reluctance in circuit
